

RENTOMOJO PHONEBOOK PROJECT

In this Phonebook a user can add, delete and edit the contact details.

The 3 modules in the project are:

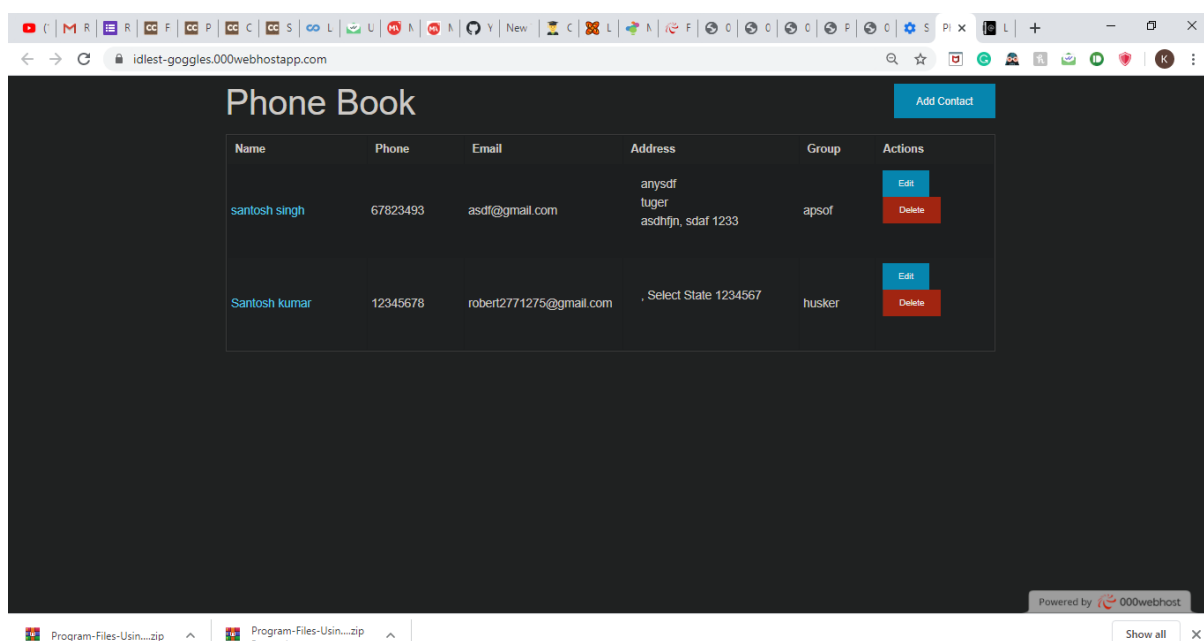

i) Add Contact

ii) Edit

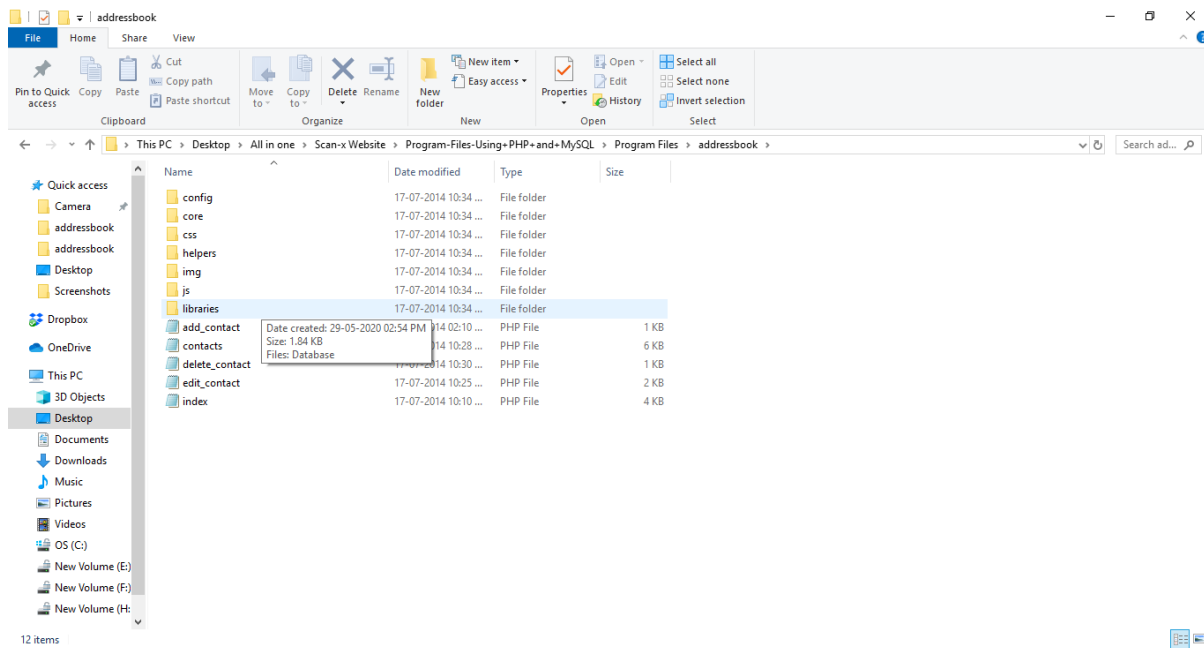

iii) Delete

I have developed this phonebook file using HTML, CSS, JS, PHP and MYSQL

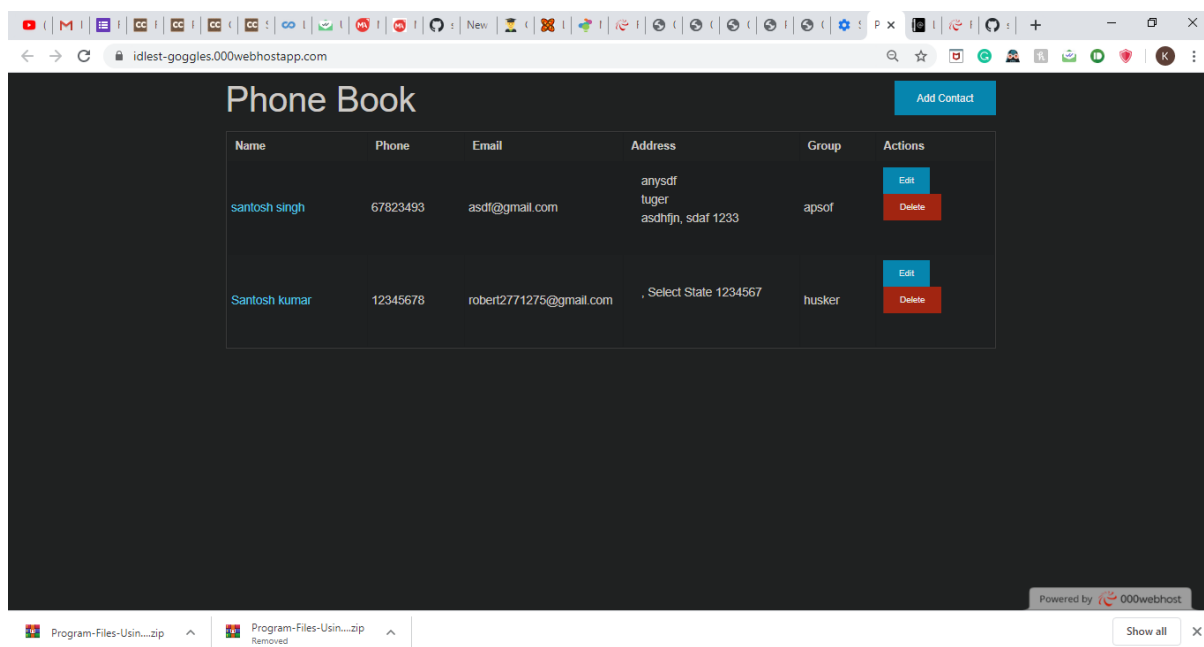

The UI of the project be like:

The folders and files that we create in the initial stage are:

After finishing up with the code our U.I looks be like

So we can add, delete and edit the contacts.

Coming to Add Contact Details:

1)Add Contact Module

The screenshot shows a web browser window with the URL `idlest-goggles.000webhostapp.com`. The page title is "Phone Book". A modal window titled "Add Contact" is open, displaying a form with the following fields:

- First Name: Enter First Name
- Last Name: Enter Last Name
- Email: Enter Email Address
- Phone Number: Enter Phone Number
- Contact Group: Family (dropdown menu)
- Address 1: Enter Address 1
- Address 2: Enter Address 2
- City: Enter City
- State: Select State (dropdown menu)
- Zipcode: Enter Phone Number
- Notes: Enter Optional Notes

A "Submit" button is located at the bottom right of the form. The form is powered by 000webhost.

If we want to make any changes the details we can do it by editing the details and finally

2)Edit Contact

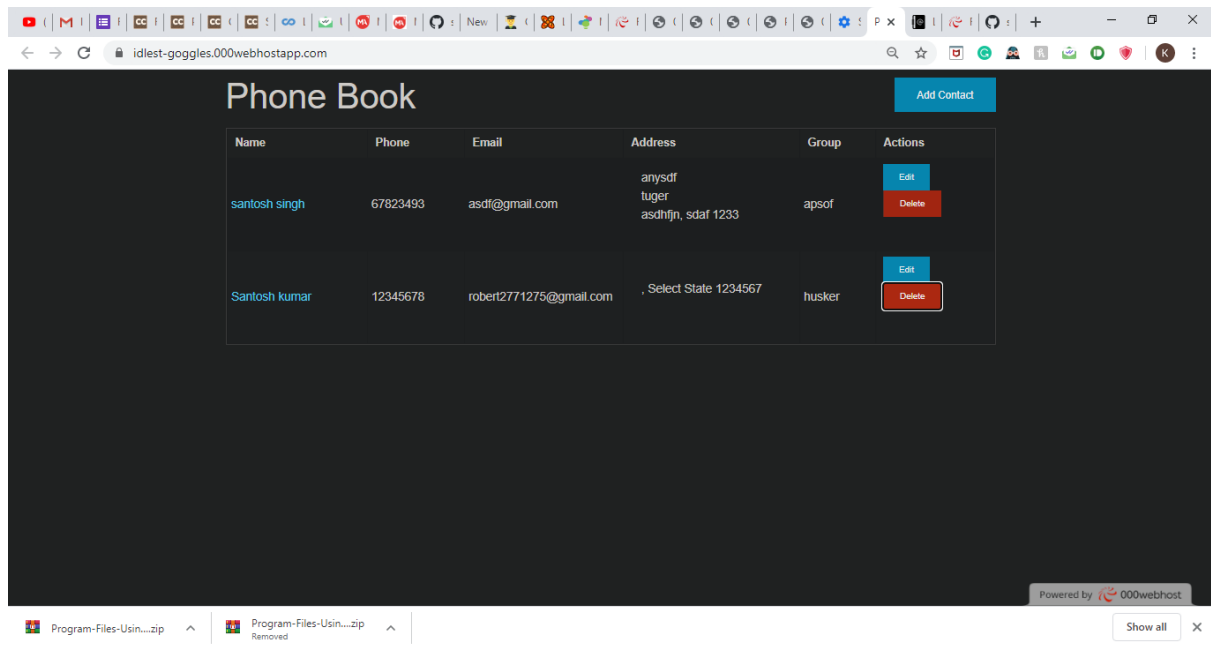

The screenshot shows the same web browser window, but the modal window is now titled "Edit Contact". The form fields are pre-filled with the following values:

- First Name: santosh
- Last Name: singh
- Email: asdf@gmail.com
- Phone Number: 67823493
- Contact Group: Family (dropdown menu)
- Address 1: anysdf
- Address 2: tuger
- City: asdhijn
- State: Alabama (dropdown menu)
- Zipcode: 1233
- Notes: zds

A "Submit" button is located at the bottom right of the form. The form is powered by 000webhost.

In this case the default values in the column will be recorded any if we want to make any changes in the details entered then we can do it by edit option.

3)DELETE OPTION

By using delete option user can able to delete the record.
